Calls

Calls ≠ Topics

Una call puede tener varios topics

Las propuestas se presentan a un topic determinado

Documentación básica de cada call:

- Programa de Trabajo (Introducción + específico + anexos generales)
- Bases legales H2020: Reglamento + Reglas de Participación

Topics

Líneas temáticas concretas a financiar

3 elementos clave (evaluación)

- **Reto Específico** – especifica el contexto, el problema a resolver
- **Objetivo** – especifica el foco y las líneas generales de la posible acción, pero sin especificar demasiado
- ***Impacto esperado*** – describe los elementos clave de lo que se espera obtener

Tipo de Instrumento (RIA, IA, CSA…)

Presupuesto estimado de los proyectos

Áreas relevantes de la política de la UE (si aplica)

Ejemplo RIA – Reto 6

EURO-6-2015: Meeting new societal needs by using emerging technologies in the public sector

•Specific challenge: Public sector innovation and the modernisation of public administrations are considered as important underlying factors for economic growth and also contribute to competitiveness.

•In order to improve efficiency, effectiveness and quality of public services, the public sector needs to implement new processes, products, services and methods of delivery.

a) Research and innovation actions

Activities will support the preparation of next phases and possible validation in near to operational environment for the implementation of emerging ICT technologies in the public sector.

The focus can be on any or several of the below:

- Improving **effectiveness and efficiency of public administrations**;
- **--------**
- **Transforming delivery of public services to business** and citizens taking account of diversity (gender, age, disability etc);
- **Uptake and acceptability of the use of emerging technologies in the public sector;**
- **Reducing the administrative burden** of citizens and businesses;
- Offering inclusive public services.

The Commission considers that proposals requesting a contribution from the EU of between **EUR 2 and 5 million**

Acciones de Innovación (IA)

Actividades dirigidas a la elaboración de planes y estructuras o diseños de productos, procesos o servicios nuevos. Prototipos, ensayos, pilotos, demostradores, primeras replicaciones de mercado…

Más cercanas al mercado.

Orientadas a nuevas formas y fuentes de innovación (mas allá de la innovación tecnológica)

Mínimo 3 participantes

70% financiación Entidades “Profit” o 100% para “Non-Profit”

Ejemplo IA – Reto 6

- **YOUNG-5-2014: Societal and political engagement of young people and their perspectives on Europe**

Specific challenge: Since its creation, the European Union has been constantly changing, shaped by European citizens, and young people represent both its present and its future….However, ……..**half of the young people tend to distrust the European Union** and this percentage has constantly increased in the aftermath of the crisis, rising to 50% in 2012….In this context it is important to **understand how young people participate in the society** under unequal regional conditions and expectations, **express their views** (also in terms of language, meaning and media) **and advocate their interests**

b) The foreseen **innovation actions on open participation and open engagement** shall develop reusable service components, methods and applications to enable public authorities to quickly open their decision-making processes. ----------

The services need to be open and should take into consideration political, organisational, social, linguistic and cultural differences across the EU.

Between **EUR 1 and 3 million**

RIA vs. IA

Topic: Forecasting and anticipating effects of climate change on fisheries and aquaculture **BG-02-2015**

Información Detallada Topic

Topic Description | Topic Conditions & Documents | Submission Service

Specific challenge Global warming and climate change are likely to affect all the biosphere's components and impact the functioning of all aquatic ecosystems and the living organisms that populate them. In the context of an increasing global population and demand for sufficient and safe food supplies, it is critical to predict and anticipate the nature and magnitude of potential impacts of climate change on food production systems. A lot of scientific effort is put on the understanding of the interrelations between the oceans and the climate system, which is also a key prerequisite for predicting and anticipating potential consequences of climate change on seafood production methods and systems. Ensuring sufficient preparedness and quick adaptation capacity of European marine and freshwater fisheries and aquaculture sectors to potential threats and opportunities due to climate change might be decisive for the long term sustainability of the two sectors, as well as for guaranteeing to European consumers and societies an acceptable degree of self-sufficiency of seafood supplies.

Scope: Proposals should give similar emphasis on both (A) and (B):

A. Proposals should focus on understanding how climate change may affect the most important and less resilient exploited European fish stocks and should cover the diversity of ecosystems and EU fisheries. They should provide new insights, at different geographic scales (in the major European oceans, seas and inland waters) and different climate change scenarios, on how climate-induced changes may affect important biological processes (including, reproductive success, population dynamics, migration patterns, interactions between fish populations, etc.). Particular focus should be given on risk assessment and management, elaboration of adaptation strategies for fisheries management and development of novel forecasting and early warning methodologies.

How to participate

H2020 ONLINE MANUAL

The first steps to prepare your proposal and apply for EU research funding. Learn how to find a suitable Call for proposals or project partners and how to submit your proposal.

The following guidance services facilitate your participation:

- **H2020 Online Manual:** step-by-step online guide through the Portal processes from proposal preparation and submission to reporting on your on-going project
- **Reference documents:** library of legal documents, guidance notes, and additional reference material for H2020 and FP7
- search for already registered organisations and their **PICs**
- **Financial viability self-check tool** allows you simulating the financial viability check of your organisation
- **SME participation:** dedicated H2020 guidance page for SME

FIND a call (1) — FIND partners (2) — CREATE your account (3) — REGISTER your organisation (4) — SUBMIT a proposal (5)

Step 1 - Find a suitable Call for Proposals

H2020 ONLINE MANUAL

The Commission publishes on the Participant Portal all the Calls of its research and innovation programmes H2020, and you can search calls from previous programmes (FP7 and CIP). In addition you can find information about some additional calls in the Other Funding Opportunities section. If you apply for the first time and do not know yet the programmes, it is useful to read the H2020 Online Manual. It helps you choose the most suitable programme for your area and profile. Besides, you can search according to your research topic with key words and set filters in the calls list.

Your National Contact Point can also help you find the most suitable call for your profile. SMEs are in addition supported by the Enterprise Europe Network.

Step 2 - Find project partners or apply as an individual

H2020 ONLINE MANUAL

Collaborative projects: most of the EU funded projects are collaborative projects with **at least 3 organisations** from different EU Member States or Associated countries. Various partner search services help you to find organisations that would like to participate in the proposals. You can also post your collaboration offers there.
